

4182 Slanting Bridge Rd Water & Sewer Information

Per a phone conversation with Jack Chandler of Catawba County water and sewer, water is currently available. Sewer is not directly available but there are options. The sewer that is on Slanting Bridge Rd that services Blackstone Bay (diagonally across the street) is a force main and can not be tapped into. Option 1: pump to Hwy 150.

*Option 2: Send sewage down to Blackstone Bay and tie into that lift station IF CAPACITY ALLOWS (Capacity will depend on how many units will be built at subject property). Jack says the town of Hickory will have final say / approval.
