PROPERTY SUMMARY

Small pieces of property can produce big results, and there are two factors in this practice: location and shape. Long, narrow pieces of property allow you access to large areas of hunting. There is a well-made trail from the front to the back of the property. With the correct wind direction, you could possibly gun-hunt three hunters on the large piece. Also, there can be a hunter on the small piece. There are three micro-plots and one big food plot in the back. Each food plot has a stand and a feeder on it. One is a box stand. That covers the shape. In reference to location, Macon County is well known for big game! The small parcel is the campsite away from the hunting area, but close enough to walk to. There is a pad and electricity on the small parcel. It is worth your time.
